

Alonissos, 14th January 2021

Dear Dr. Helge Landmann

I am responding to your document with the award “Stifterpreis der Bürgerschaft der Stadt Meißen” a bit late due to the fact that the covid-19 restrictions brought me the news and the angel quite late.

I must tell from the very beginning that, though I have received numerous distinctions and awards in my life, I felt that this one was so unique like receiving a live direct message from Hahnemann that brought to my soul a fresh air from this unique Master of Medicine. I felt as if Hahnemann himself had sent his approval and recognition for my life spent totally with dedication to His spirit and His extraordinary discoveries.

I felt that whoever wrote this Laudatio was a pure soul guided from our Teacher. I had always felt that this extraordinary individual Samuel Hahnemann descended to this earth to bring solace and peace to a tormented and suffering humanity. His genius and his tremendous contribution to humanity had not been appreciated so far even from his own compatriots.

For me, reading his “Organon of Medicine” was like a revelation of a tremendous impact from a true healing methodology that was hidden from the eyes of humanity for two hundred years buried in the sand and hardly appreciated. Even the teachings of his best follower Dr James Tyler Kent had been hidden and lied there as a philosophical thesis rather than practical medicine.

When I came in contact with the teaching of these two extraordinary individuals, an opening of my consciousness took place and together with it came the desire to make known to the world the value of His teachings.

Humanity owes a lot to Him. Humanity should be forever grateful to Him as I am grateful for having given me purpose to my humble life.

I want to bless you all for thinking of this award

Yours sincerely

Professor George Vithoulkas
